

Velliqo AI text and voice assistant

Step-by-step guide

Purpose

Ask useful questions, use voice safely and review confirmations before the assistant performs protected actions.

Related workspace

/dashboard/ai?mode=assistant

Recommended workflow

- 1 Open the related workspace and confirm that you are working inside the correct business.
- 2 Review existing records and settings before creating or changing information.
- 3 Complete the required fields carefully and use the checklist below as a final review.
- 4 Save the change and confirm the result appears correctly in the workspace and customer experience.
- 5 Use Velliqo AI for guidance when useful, but review every confirmation before a protected action is executed.

Owner checklist

✓	Confirm: business question
✓	Confirm: voice or text
✓	Confirm: evidence
✓	Confirm: confirmation

Safety and control

Use only accurate business information. Important actions remain under owner control. Never share passwords, secret keys or sensitive payment information in notes or AI messages.
