

VELLIQO OWNER COURSE

Calendar and appointment management

Professional step-by-step guide

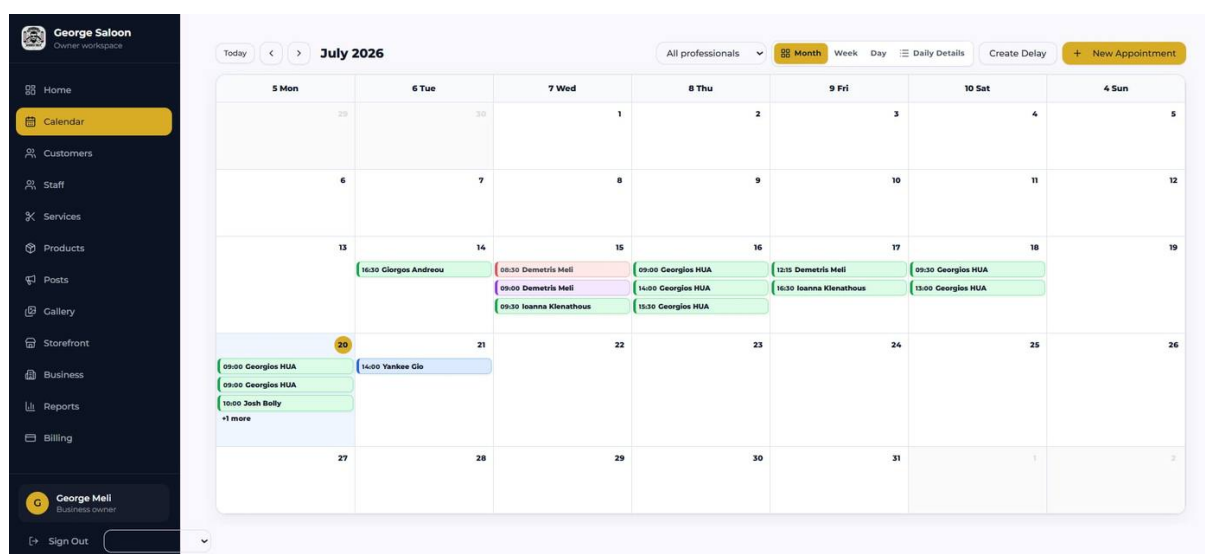

Create, edit, reschedule and cancel appointments while preventing conflicts and protecting the customer experience.

Workspace route

/dashboard/calendar

What you will complete

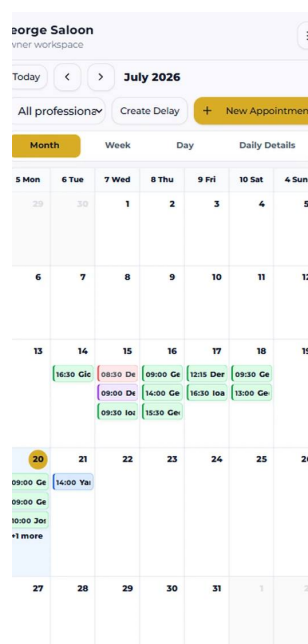

- Select New appointment or tap an empty time slot in the calendar.
- Choose customer, service, professional, date and start time. Review duration, price and conflict warnings before confirmation.
- Confirm the appointment appears in the correct professional column and customer history. Test edit, reschedule and cancel using the appointment details dialog.

Actual Velliqo application example. Layout may adapt to screen size and selected industry.

Exact workflow

4

Review and confirm

Choose customer, service, professional, date and start time. Review duration, price and conflict warnings before confirmation.

5

Verify the result

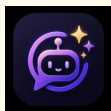

Confirm the appointment appears in the correct professional column and customer history. Test edit, reschedule and cancel using the appointment details dialog.

Final owner checklist

✓	Select New appointment or tap an empty time slot in the calendar.
✓	Choose customer, service, professional, date and start time. Review duration, price and conflict warnings before confirmation.
✓	Confirm the appointment appears in the correct professional column and customer history. Test edit, reschedule and cancel using the appointment details dialog.

If the result is not correct

Do not repeat the action blindly. Re-open the record, confirm the selected business, date, service and professional, and use Velliqo AI or the Contact page with a screenshot of the issue.

Safety and data protection

Use accurate business data. Never place passwords, secret keys, full payment card details or unnecessary sensitive personal information in notes, forms or AI messages.
