

Business profile and storefront

Professional step-by-step guide

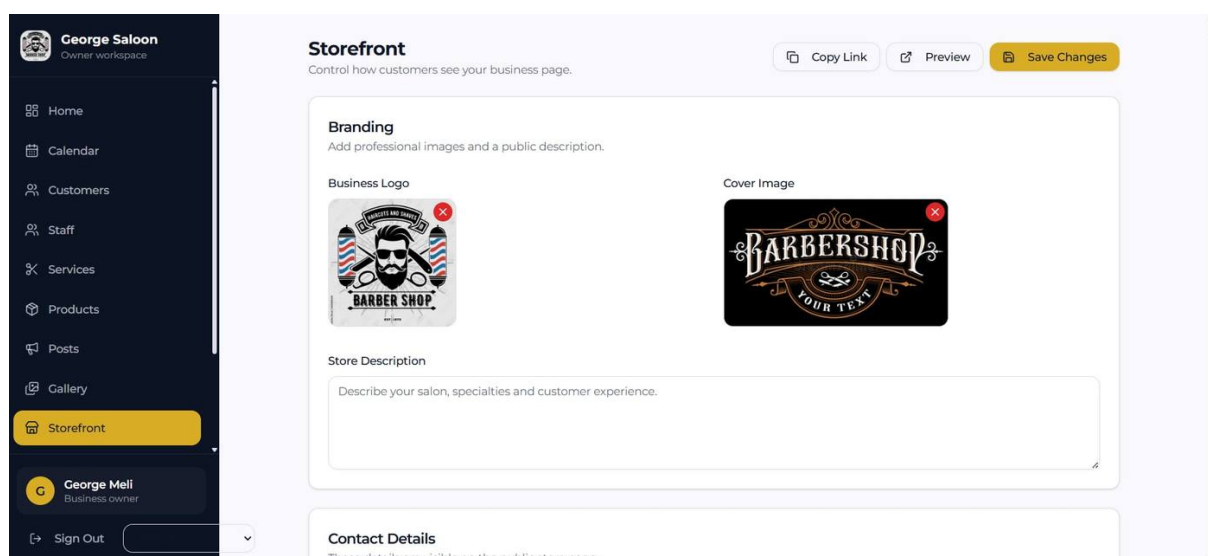

Configure the public business page, contact details, booking information and customer-facing presentation.

Workspace route

/dashboard/storefront

What you will complete

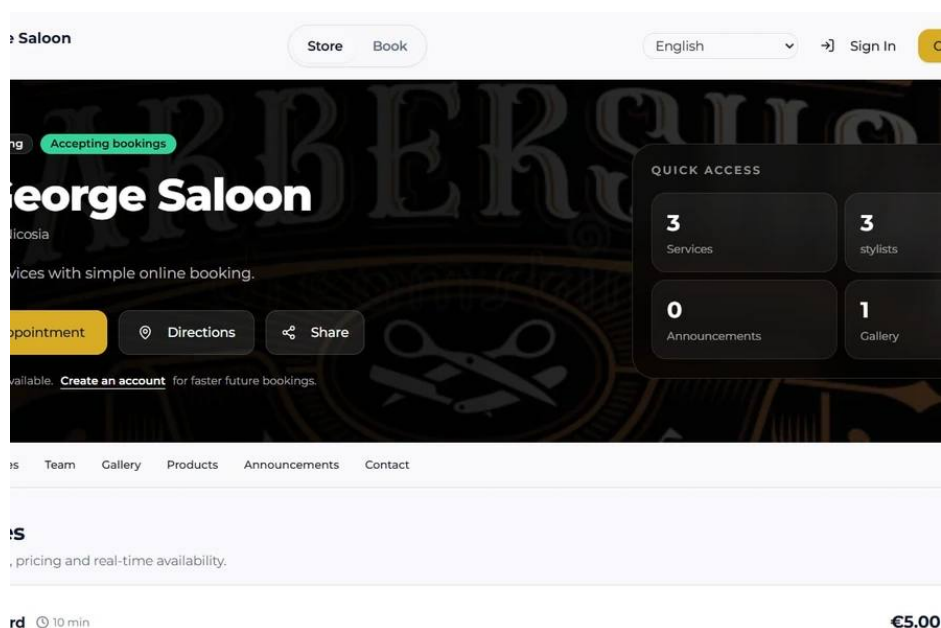

- Open Storefront and select the public profile or booking preview.
- Add the public description, contact details, address, booking instructions, logo and approved gallery images.
- Use Preview and open the customer booking link in a private browser window. Confirm services, contact information and availability are correct.

Actual Velliqo application example. Layout may adapt to screen size and selected industry.

Exact workflow

- 1** Open the correct workspace
Open Storefront and select the public profile or booking preview.
- 2** Start the action
Open Storefront and select the public profile or booking preview.
- 3** Complete the required information
Add the public description, contact details, address, booking instructions, logo and approved gallery images.

Actual Velliqo application example. Layout may adapt to screen size and selected industry.

Exact workflow

4

Review and confirm

Add the public description, contact details, address, booking instructions, logo and approved gallery images.

5

Verify the result

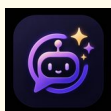

Use Preview and open the customer booking link in a private browser window. Confirm services, contact information and availability are correct.

Final owner checklist

✓	Open Storefront and select the public profile or booking preview.
✓	Add the public description, contact details, address, booking instructions, logo and approved gallery images.
✓	Use Preview and open the customer booking link in a private browser window. Confirm services, contact information and availability are correct.

If the result is not correct

Do not repeat the action blindly. Re-open the record, confirm the selected business, date, service and professional, and use Velliqo AI or the Contact page with a screenshot of the issue.

Safety and data protection

Use accurate business data. Never place passwords, secret keys, full payment card details or unnecessary sensitive personal information in notes, forms or AI messages.
