

VELLIQO OWNER COURSE

Getting started with Velliqo

Professional step-by-step guide

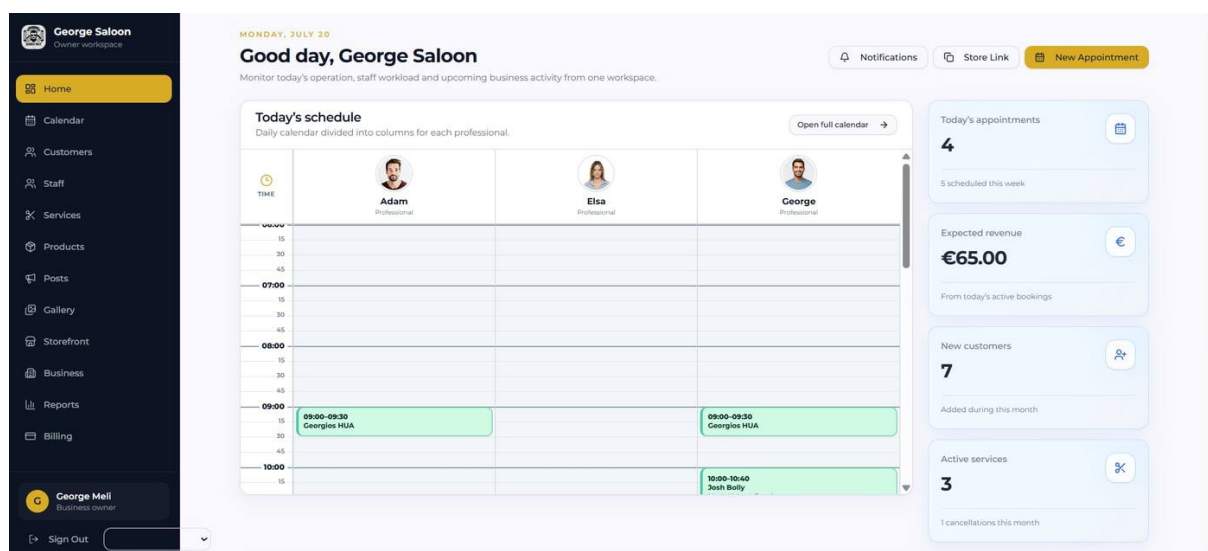

Set up the essential business information, understand the owner workspace and complete the first-day checklist.

Workspace route

/dashboard/business

What you will complete

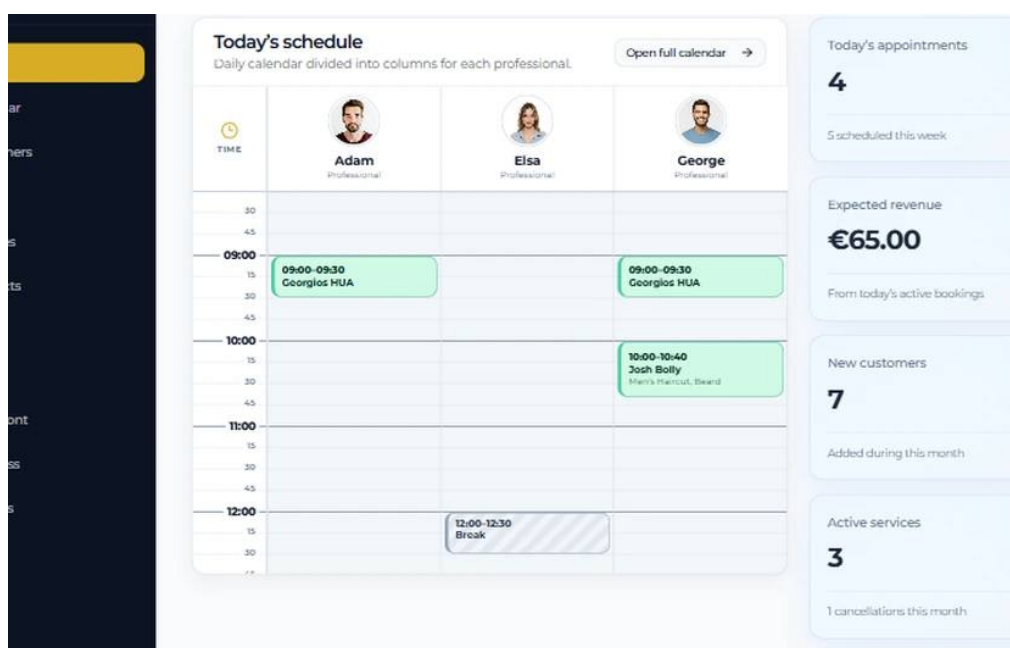

- Open Business from the owner navigation and review the business identity card.
- Confirm business name, industry, phone, email, address, timezone and currency. Replace sample values with accurate information.
- Save once, refresh the page and confirm the same information appears in the owner header and public storefront preview.

Actual Velliqo application example. Layout may adapt to screen size and selected industry.

Exact workflow

- 1 Open the correct workspace
Open Business from the owner navigation and review the business identity card.
- 2 Start the action
Open Business from the owner navigation and review the business identity card.

Exact workflow

4

Review and confirm

Confirm business name, industry, phone, email, address, timezone and currency. Replace sample values with accurate information.

5

Verify the result

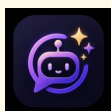

Save once, refresh the page and confirm the same information appears in the owner header and public storefront preview.

Final owner checklist

✓	Open Business from the owner navigation and review the business identity card.
✓	Confirm business name, industry, phone, email, address, timezone and currency. Replace sample values with accurate information.
✓	Save once, refresh the page and confirm the same information appears in the owner header and public storefront preview.

If the result is not correct

Do not repeat the action blindly. Re-open the record, confirm the selected business, date, service and professional, and use Velliqo AI or the Contact page with a screenshot of the issue.

Safety and data protection

Use accurate business data. Never place passwords, secret keys, full payment card details or unnecessary sensitive personal information in notes, forms or AI messages.
