

VELLIQO OWNER COURSE

Products, inventory and sales

Professional step-by-step guide

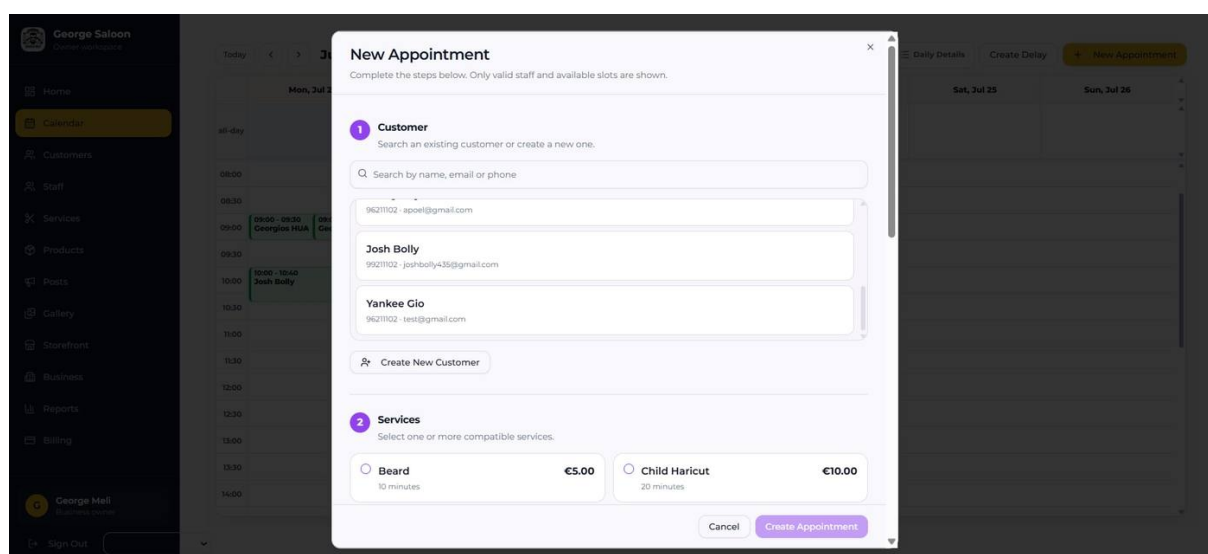

Maintain product stock, record sales and understand how transactions affect inventory and reports.

Workspace route

/dashboard/products

What you will complete

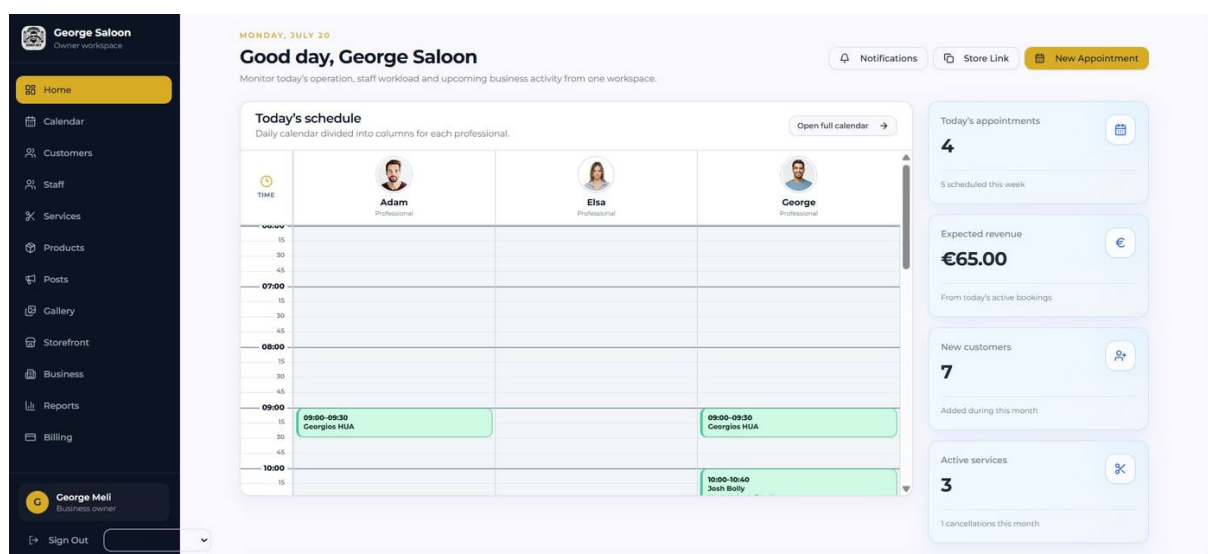

- Open Products to add inventory, then use Sales for a sample checkout.
- For each product set name, SKU if used, sale price, stock quantity and low-stock threshold. In checkout select customer, items, quantity and payment method.
- Complete the sale and confirm receipt status, stock reduction and reporting totals. If voiding, verify stock is restored.

Actual Velliqo application example. Layout may adapt to screen size and selected industry.

Exact workflow

- 1 Open the correct workspace
Open Products to add inventory, then use Sales for a sample checkout.
- 2 Start the action
Open Products to add inventory, then use Sales for a sample checkout.
- 3 Complete the required information
For each product set name, SKU if used, sale price, stock quantity and low-stock threshold.
In checkout select customer, items, quantity and payment method.

4

Review and confirm

For each product set name, SKU if used, sale price, stock quantity and low-stock threshold. In checkout select customer, items, quantity and payment method.

5

Verify the result

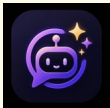

Complete the sale and confirm receipt status, stock reduction and reporting totals. If voiding, verify stock is restored.

Final owner checklist

✓	Open Products to add inventory, then use Sales for a sample checkout.
✓	For each product set name, SKU if used, sale price, stock quantity and low-stock threshold. In checkout select customer, items, quantity and payment method.
✓	Complete the sale and confirm receipt status, stock reduction and reporting totals. If voiding, verify stock is restored.

If the result is not correct

Do not repeat the action blindly. Re-open the record, confirm the selected business, date, service and professional, and use Velliqo AI or the Contact page with a screenshot of the issue.

Safety and data protection

Use accurate business data. Never place passwords, secret keys, full payment card details or unnecessary sensitive personal information in notes, forms or AI messages.
