

VELLIQO OWNER COURSE

Reports and financial visibility

Professional step-by-step guide

Read revenue, appointment, customer and operational reports without confusing activity with accounting advice.

Workspace route

/dashboard/reports

What you will complete

- Open Reports, choose the date range and review the summary metrics before opening detailed sections.
- Compare revenue, completed appointments, cancellations, customers, staff utilisation, services and product performance using the same period.
- Export only after confirming the date range and currency. Treat operational reports as business visibility, not formal accounting or tax advice.

Actual Velliqo application example. Layout may adapt to screen size and selected industry.

Exact workflow

- 1 Open the correct workspace
Open Reports, choose the date range and review the summary metrics before opening detailed sections.
- 2 Start the action
Open Reports, choose the date range and review the summary metrics before opening detailed sections.
- 3 Complete the required information
Compare revenue, completed appointments, cancellations, customers, staff utilisation, services and product performance using the same period.

Actual Velliqo application example. Layout may adapt to screen size and selected industry.

Exact workflow

- 4** Review and confirm
Compare revenue, completed appointments, cancellations, customers, staff utilisation, services and product performance using the same period.
- 5** Verify the result
Export only after confirming the date range and currency. Treat operational reports as business visibility, not formal accounting or tax advice.

Final owner checklist

✓	Open Reports, choose the date range and review the summary metrics before opening detailed sections.
✓	Compare revenue, completed appointments, cancellations, customers, staff utilisation, services and product performance using the same period.
✓	Export only after confirming the date range and currency. Treat operational reports as business visibility, not formal accounting or tax advice.

If the result is not correct

Do not repeat the action blindly. Re-open the record, confirm the selected business, date, service and professional, and use Velliqo AI or the Contact page with a screenshot of the issue.

Safety and data protection

Use accurate business data. Never place passwords, secret keys, full payment card details or unnecessary sensitive personal information in notes, forms or AI messages.
