

Services, duration and pricing

Professional step-by-step guide

Create services with clear prices and durations so availability and booking slots are calculated correctly.

Workspace route

/dashboard/services

What you will complete

- Select Add service or open an existing service to edit it.
- Enter a clear service name, description, exact duration, price, active status and the team members who can provide it.
- Save and test the public booking flow. Confirm slot length matches the duration and no overlapping appointment can be created.

The screenshot shows a mobile application interface for 'BARBER SHOP SETUP' with the title 'Create your business'. It features a progress bar and a section titled 'Add Initial Services' with a subtext: 'Add each service with its customer price and the exact time required in minutes. Suggested services are based on Barber Shop.' Below this is a '1 Service details' form with 'REQUIRED FIELDS'. The form includes: 'Service name' (with a hint 'What customers will book' and the input 'Haircut'), 'Category' (with a hint 'Used to organise your service menu' and the input 'Hair Services'), 'Customer price' (with a hint 'Amount charged for this service', a currency selector set to 'EUR', and the input '25'), and 'Service duration' (with a hint 'Time blocked in the calendar' and the input '30 minutes'). At the bottom are buttons for '+ Add Another Service', 'Back', and 'Next Step'.

Exact workflow

- 1 Open the correct workspace
Select Add service or open an existing service to edit it.
- 2 Start the action
Select Add service or open an existing service to edit it.
- 3 Complete the required information
Enter a clear service name, description, exact duration, price, active status and the team members who can provide it.

The screenshot shows the 'Book with George Saloon' interface. At the top, there's a header with the saloon name 'George Saloon' and location 'Nicosia', along with 'Store' and 'Book' buttons. A language dropdown is set to 'English', and there are 'Sign In' and 'Create Account' links. Below the header, a progress bar shows four steps: 1. Services (active), 2. Professional, 3. Date & Time, and 4. Your Details. The main section is titled 'Choose Services' with a subtext 'Select one or more services for the same appointment.' It displays three service cards: 'Beard' (€5.00, 10 minutes), 'Child Haircut' (€10.00, 20 minutes), and 'Men's Haircut' (€15.00, 30 minutes). The 'Men's Haircut' card is highlighted with a yellow border and a 'Selected' button. A 'Continue to Professional' button is at the bottom right of the service selection area. On the right side, a 'Booking Summary' panel lists the selected services, professional status ('Any available'), date ('2026-07-20'), time ('Not selected'), estimated finish ('Not available'), duration ('30 minutes'), and total price ('€15.00'). The location 'Akakiou 14 Deneia' is also shown.

Exact workflow

4

Review and confirm

Enter a clear service name, description, exact duration, price, active status and the team members who can provide it.

5

Verify the result

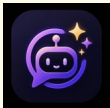

Save and test the public booking flow. Confirm slot length matches the duration and no overlapping appointment can be created.

Final owner checklist

✓	Select Add service or open an existing service to edit it.
✓	Enter a clear service name, description, exact duration, price, active status and the team members who can provide it.
✓	Save and test the public booking flow. Confirm slot length matches the duration and no overlapping appointment can be created.

If the result is not correct

Do not repeat the action blindly. Re-open the record, confirm the selected business, date, service and professional, and use Velliqo AI or the Contact page with a screenshot of the issue.

Safety and data protection

Use accurate business data. Never place passwords, secret keys, full payment card details or unnecessary sensitive personal information in notes, forms or AI messages.
