

Team members and availability

Professional step-by-step guide

Add professionals, assign working hours and maintain accurate availability for each person.

Workspace route

/dashboard/staff

What you will complete

- Select Add team member, enter the professional profile and assign the correct role.
- Configure working days, start and end times, breaks, services and any day-specific availability.
- Open Calendar and public booking. Confirm the professional appears only during configured hours and only for assigned services.

Actual Velliqo application example. Layout may adapt to screen size and selected industry.

Exact workflow

- 1 Open the correct workspace
Select Add team member, enter the professional profile and assign the correct role.
- 2 Start the action
Select Add team member, enter the professional profile and assign the correct role.
- 3 Complete the required information
Configure working days, start and end times, breaks, services and any day-specific availability.

Actual VelliQo application example. Layout may adapt to screen size and selected industry.

Exact workflow

4

Review and confirm

Configure working days, start and end times, breaks, services and any day-specific availability.

5

Verify the result

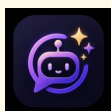

Open Calendar and public booking. Confirm the professional appears only during configured hours and only for assigned services.

Final owner checklist

- | | |
|---|---|
| ✓ | Select Add team member, enter the professional profile and assign the correct role. |
| ✓ | Configure working days, start and end times, breaks, services and any day-specific availability. |
| ✓ | Open Calendar and public booking. Confirm the professional appears only during configured hours and only for assigned services. |

If the result is not correct

Do not repeat the action blindly. Re-open the record, confirm the selected business, date, service and professional, and use Velliqo AI or the Contact page with a screenshot of the issue.

Safety and data protection

Use accurate business data. Never place passwords, secret keys, full payment card details or unnecessary sensitive personal information in notes, forms or AI messages.
