

Products, inventory and sales

Step-by-step guide

Purpose

Maintain product stock, record sales and understand how transactions affect inventory and reports.

Related workspace

/dashboard/products

Recommended workflow

- | | |
|---|---|
| 1 | Open the related workspace and confirm that you are working inside the correct business. |
| 2 | Review existing records and settings before creating or changing information. |
| 3 | Complete the required fields carefully and use the checklist below as a final review. |
| 4 | Save the change and confirm the result appears correctly in the workspace and customer experience. |
| 5 | Use Velliqo AI for guidance when useful, but review every confirmation before a protected action is executed. |

Owner checklist

✓	Confirm: stock level
✓	Confirm: price
✓	Confirm: sale
✓	Confirm: inventory movement

Safety and control

Use only accurate business information. Important actions remain under owner control. Never share passwords, secret keys or sensitive payment information in notes or AI messages.
